

Sprint 1 Retrospective

- During your retrospective, spend at least 10 minutes talking over:
 - What went well? – Setting up the database, implementing user authentication, enforcing coding standards, and collaborating.
 - What didn't go well – We added more tasks to each sprint than we should have, we overestimated what we could get done in a 2 week period.
 - What specific things you can do to improve – Predicting how many tasks that we can get done over a 2 week period.
 - List the measurement criteria – Each of us put in about 8 hours in this sprint. We had 4 Sprint meetings in the 2 week period.
 - Assign a percentage to each team member based on your metric specified in this sprint's planning – each of us 25%. We all were pretty even.
 - Each person should have a percent between 0-100% - 25%
 - Total percent for the team should be 100% -100%
 - Include the scrum master, and all of the members of the group (marking those who are present). – Ryan Gubler(Scrum Master), Josh Hatch, Kaiden McMillen, Michael Hanks.
